ABOUT US

Veritech Limited was established in 2008 as a provider of information technology based security installation and integration for various business sectors. We specialize in installation and integration of Video Surveillance system, Access Control system, Fire Detection systems, Intrusion Detection systems, Video/Audio Door phone systems and Car Parking systems. To compliment the above installations, we also have an experienced team in Structure Cabling and IP phones. We represent technologically and globally reputed manufacturers of security equipment and solutions for small and medium enterprises to high end turnkey projects for corporate sector as well as government. We have an excellent repertoire of overseas partners and suppliers and focus on the aspects of our products that are of importance to sectors such as hospitality, retail, transport, government and homes.

OUR VISION

To be a leading company of choice in providing electronic security and safety in Africa.

OUR MISSION

The objective of our organization is to provide futuristic client-focused security technology solutions and services through our commitment to quality and affordability, to clients who are serious about their long term asset protection needs.
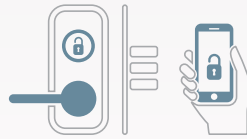

In the attainment of this, we aim to achieve an acceptable return on investment, thus enabling growth and maintaining stability. We pride ourselves in maintaining high standards from our amployees to enable us to maintain high standards of service to our clients.
